Chad W. Summerville

Objective:

To start a new career with a stable company using my existing knowledge and experience while still having the opportunity to learn new skills.

Experience:

at&t

Mar 2007- present

Cable Splicer

Splice, connect, rearrange, repair, transfer, bond, ground and maintain aerial, underground and buried metallic, fiber optic network cable, wire and circuit facilities. Installing and testing fiber transmission cables, F1 and F2 cables, T-1 lines, repeater cases, remote terminals, and customer terminals. Completing throws, recons, and cross- connects. Updating cable records with FACS desk. Locate, isolate, restore and repair cable faults in network facilities. Monitor and maintain properly sealed closures and cable pressurization; locate and repair leaks, perform cable acceptance testing. Reviewed and interpreted service orders and diagrams, determined specifications. Test for gas and environmentally hazardous waste water; empty water and debris from manholes. Use tools and specialized test equipment to make all tests and adjustments necessary to place facilities in operation, trouble shooting. Operate specialized power and company vehicles/equipment applicable to the job. Climb poles and ladders; work aloft; work underground in manholes, ditches and in close quarters. All in compliance with bell standard practices. Carried out emergency repairs as necessary due to storms or cable breakage. Interface with customers at job sites.

Telecom Technicians Inc.

TTI, Inc. is an ISO 9001-2000 certified company
Jan 2001-Jan 2007

Installation Technician

Installing equipment from manufacturers such as Fujitsu, Alcatel, Cisco, UMC, Avaya, Secor, ADC, Hendry, Wescom, Adtran, Luccent, Telect, Nortel, Dantel and Tellabs

Duties included color-code, wire wrapping and lacing. H-Tapping and lugs for power, returns and aisle grounds. Isolated and integrated ground plan differences. Auxiliary framing, bay installation, BNC's for 734/735 co-ax, stenciling/P-touch. Testing and provisioning services, cable mining and DC power.

Lead Technician

As a carrier service group lead technician I performed all duties of an installation tech while training new hires per company guidelines. Lead tech duties also included project management, site surveys, fiber db loss testing, standard lead or conductor verification and testing using streaker card, t-berd, volt-ohm-meter and probe, system testing and/or turn up, loading software for testing/turn up, receiving and checking equipment at job site. Also as a lead technician I was responsible for scheduling internal in-progress and final quality audits, compiling weekly efficiency reports on installers/jobs to verify progress, marking changes on drawings and completing all necessary paperwork.

Service Center Manager

As a warehouse service center manager I was responsible for training new personnel, scheduling deliveries and staging jobs, setting up new jobs in the database, overseeing the receiving of materials ordered for jobs and stock for nonconformance's and disposition of received materials. I was also in charge of scheduling job closeouts, coordinating subcontractors requirements, responsible for all calibrated tools and vehicle maintenance, and overseeing monthly and year end inventory count. This included updating the database with new purchase orders, and material used on jobs.

Education and Training:

Tyler Junior College
Jan 01-May 02

Classes Included:

DC Circuits

AC Circuits

Digital Fundamentals

Intro to Telecommunications

Computer Networking Technology

Digital Data Communications

Telecommunications Transmission Media

Telecommunications Broadband

While attending TJC, I maintained a 4.0 grade point average in almost all of the above classes. At the end of the semester my GPA was 3.92 for all completed courses.

Training through at&t included 180+ hours in

cable splicing, pole climbing, manholes, first aid/CPR and safety

Classes included environmental compliance, security and access control and building safety.

Considerations:

I believe I have a lot to offer any company considering me for employment. I have a proven record of highest productivity levels in the field. I am honest, truly hardworking and dependable. I have proven leadership abilities and am respectful to my superiors and co-workers. Given the opportunity to try a new skill you will find I am an eager and fast learner. Thank you for considering me for this position within your company.

Letters of Recommendation Attached

To whom it may concern.

Chad Summerville has been a great asset to AT&T for the last twenty months in the construction department. He has done everything that was asked of him and more. He has accepted every challenge with enthusiasm and hard work. I have had no problems from him and he stays busy without close supervision. Chad has worked various hours including nights and weekends.

I would recommend Chad for employment. If you have any questions about his work or work habits, please feel free to call me

Danny Burris

Construction Manager

Tyler, Tx.

903-597-7408

To whom it may concern,

It has been my pleasure to work with Chad Summerville over the last 2 years at at&t. Chad is a very knowledgeable and hard working employee. During Chad's employment with at&t, he has taken on every task with pride and enthusiasm. He is a self motivated individual with the ability to make good decision without supervision.

I feel Chad would be extreme asset to any company needing an honest, dependable and hard working employee. Chad has my full recommendation for any employment opportunities that may arise. He would be a benefit to any company, not just ones in the telecommunications industry.

If you have any questions about Chad or his work here at at&t, please feel free to contact me.
